

FOR IMMEDIATE RELEASE

Forbes Ranks Veeva Fourth Fastest Growing Public Tech Company

Veeva among top global leaders in Forbes' annual Fast Tech 25 list

BARCELONA, Spain — 3 May 2016 — Veeva Systems (NYSE: VEEV), a leading provider of industry cloud solutions for life sciences, was named among the top fastest growing public technology companies on *Forbes'* annual [Fast Tech 25 list](#). Veeva's average sales growth of 47% over the past three fiscal years ranked it fourth among companies on this year's list.

Veeva's ranking signifies the growing importance of industry cloud – a new breed of specialized cloud solutions that are tailored to meet the needs of a particular industry. According to Gartner, industry-specific software is the largest segment of the enterprise software market.

For years, many industries have been stuck on aging industry-specific client/server or custom solutions and unable to transition some of their most crucial business processes to the cloud. Veeva was founded in 2007 on the premise that industry cloud would be the next wave of cloud computing and pioneered industry cloud solutions for the life sciences industry.

“Our tremendous growth has been fueled by the innovation we've brought to the cloud technology market and our commitment to customer success,” said Peter Gassner, Veeva founder and CEO. “We're honored to be among the most trusted providers to one of the largest global industries in their mission to improve and extend life.”

Veeva's industry cloud solutions are specifically designed to help life sciences companies achieve their most pressing strategic objectives in bringing drugs to market faster and more efficiently, marketing and selling them more effectively, and maintaining compliance with government regulations. Veeva's growing base of 400 customers relies on Veeva's industry cloud solutions to address a broad range of business requirements in the life sciences industry.

Each year *Forbes* ranks the 25 fastest-growing technology companies based on their three-year average sales growth rates. *Forbes* evaluated more than 5,000 public traded technology companies, looking for profitable companies with a minimum revenue of \$150 million and a minimum market value of \$500 million. *Forbes* then looked for firms with sales growth of at least 10% for each of the past three fiscal years and over the latest 12 months to compile its final rankings.
