veeva Clinical Operations

Simplify and standardize trial execution

Veeva offers the industry's first and only group of applications that unifies clinical systems and processes with software and data that enables end-to-end trial management.

In a complex trial environment, Veeva Clinical Operations simplifies and standardizes trial execution by streamlining processes, eliminating data silos, and delivering real-time visibility.

Unifying clinical operations empowers life sciences companies to make data-driven decisions, reduce costs, and conduct efficient, high-quality studies.

Business Benefits

Unify Clinical Operations.

Modernize, collaborate, and create efficiencies with one seamless platform to accelerate trials.

Own and Control Your Operational Data.

Improve decision-making, foster accountability, and build the foundation for trial management that drives better outcomes.

Improve Compliance.

Enable complete oversight of end-to-end clinical processes with a single source for trial data and documents.

Veeva eTMF

Veeva eTMF provides real-time inspection readiness and full visibility into TMF status while giving sponsors, sites, and CROs real-time and secure access to clinical documentation at every point in a trial's set-up, execution, and archival.

Veeva CTMS

Veeva CTMS is the only modern cloud application that makes it easy to unify clinical information and processes, streamline trial management, and gain complete visibility across the trial portfolio. Study teams can manage the entire end-to-end clinical trial process and gain a global view into tasks in one unified and secure system.

Veeva Payments

Veeva Payments speeds payments to clinical research sites and provides financial visibility to all study partners, ensuring sites get paid on time with greater visibility and accuracy.

Veeva Study Startup

Veeva Study Startup accelerates time to site activation by connecting global teams and enabling best practices for managing country and site start-up processes.

Veeva RTSM

Veeva RTSM is a fast, intuitive, and complete randomization and trial supply management solution designed to simplify complex processes and expedite clinical trials.

Veeva Site Connect

Veeva Site Connect allows sponsors and research sites to collaborate on a trial by automating the flow of information to and from sites during startup, execution, and closeout.

Veeva Study Training

Veeva Study Training brings sponsors, CROs, and research sites into a single platform to streamline and automate training while ensuring inspection readiness.

Veeva Disclosures

Veeva Disclosures is a flexible, configurable solution that centralizes clinical trial disclosures, accelerates submissions, and ensures regulatory compliance.

Veeva OpenData Clinical

Veeva OpenData Clinical streamlines trial management by providing accurate, compliant, and global lists of investigators and clinical research sites.

Why Veeva Clinical Operations

Veeva Clinical Operations empowers clinical teams with a unified platform for efficient trial execution. Streamlining processes and improving data visibility from start-up through closeout accelerates timelines and enhances collaboration across sponsors, sites, and CROs.
