

FOR IMMEDIATE RELEASE

New Veeva Vault Training Provides Life Sciences a Modern Cloud Application for Effective Role-based Training

*Veeva offers quality suite that unifies quality processes, document control,
and training to streamline quality management and audit-readiness*

BARCELONA, Spain — 30 May 2018 — Veeva Systems (NYSE:VEEV) today announced **Veeva Vault Training**, a new cloud application to simplify role-based training across life sciences organizations and help quality teams remain audit-ready and compliant. Together with **Veeva Vault QMS** and **Veeva Vault QualityDocs**, Veeva will deliver a unified suite of quality applications on a single cloud platform that brings together training with quality processes and document control for seamless, end-to-end quality management.

“It’s time-consuming to manage and verify that the right people are trained,” said Beth Clarke, IT R&D global business partner at Halozyme. “Bringing quality management and training together would make it easier for individuals to stay current with the latest procedures and documents as they change.”

Quality teams are limited by manual training processes and fragmented systems that make it difficult to manage and track training and connect it to document change control or quality events. Vault Training will enable life sciences companies to easily and efficiently organize, assign, and track content and information so the right people are trained on policies and procedures. A centralized view of training across the organization provides full visibility into what content exists and who has achieved qualification to ensure job-readiness.

Because Vault Training is part of the **Veeva Vault Quality Suite** of unified applications, individuals can seamlessly access critical content managed in Vault QualityDocs to efficiently complete training tasks. Also, quality events within Vault QMS automatically trigger training tasks for complete traceability and transparency of new training requirements. This enables organizations to stay current on role-based qualifications as events happen and policies change and have greater control over training content, from creation and approval to trainee completion.

“Veeva will make it easier for users to get the training they need and help administrators ensure the right roles stay current with the latest quality documents and processes,” said Kent Malmros, senior director of Vault Training. “Now quality teams can more effectively manage and deliver workplace learning so their organizations remain compliant and audit-ready.”

Vault Training provides a validation-ready system for companies to manage compliance-related training, reducing validation times from months to days. Vault QMS, Vault QualityDocs, and Vault Training are part of the Vault Quality Suite. More than 150 customers use Vault Quality applications to manage their quality processes with greater visibility and control.

Veeva Vault Training is planned for availability in late 2018.

Learn more about Vault Training at the upcoming **Veeva R&D Summit, Europe**, which will showcase the latest innovations across quality, clinical, and regulatory in Barcelona, June 12-14, 2018. The annual gathering of more than 350 delegates is complimentary for Veeva customers and invited guests. Learn more and register at veeva.com/eu/Summit.
