Gain new skills, new perspectives, and new approaches to bring back to your team

Join a community of content experts

Obtain best practices to deliver a compliant customer experience

Network and have fun

Connect with the best of the industry in Europe

What Last Year's Attendees Said:

Enjoyed the sharing of data and real organizational facts; it's often very hard to find and discuss as an industry

Fantastic opportunity to share examples from peers in an informal setting. Great to have a Special Interest Group to network

A very good overview of how to approach DAM from a business perspective and case studies from where companies are on their journey

A non-sales, user-centric forum for sharing real-life case studies is a great way to engage and move the DAM world forward
