

Seamlessly Connect Applications, Data, and People Across Your Ecosystem

Your business depends on the ability to get information where it's needed, when it's needed, whether interacting inside your organization or externally with partners and customers. But too often, your business applications are disconnected information silos that result in manual processes and inconsistent data, hindering your organization's ability to meet market demand and stay ahead of your competition.

Boomi's multi-cloud, independent platform automates business processes to accelerate your ability to integrate every part of your connected business.

Why Boomi?

The Boomi platform provides the flexibility, scalability, and security you need to integrate and automate your organization — all in one place. Our platform services work together along the entire integration and automation journey, from discovering data to connecting applications and businesses, publishing APIs, and developing low-code apps to delight your users.

Composability

Realize business value with reusable, build once, use anywhere models

Democratization

Free up your workforce to focus on innovation and do more with less

Visibility and Control

Get the security of centralized governance with an end-to-end view of your integration ecosystem

The Complete Platform for Digital Transformation

The Boomi platform helps organizations modernize and automate critical processes to achieve business outcomes faster. You get the benefit of a single, independent platform that can connect all your systems and handle all your data flows, regardless of your technology. With the Boomi platform, you can eliminate the time and expense of multiple tools, provide consistent user experiences, and get the flexibility to run your operations as you choose. With Boomi, you can:

- Optimize resources for speed and efficiency
- Enable technology to scale
- Improve customer experience through personalization
- Get the speed you need to take advantage of new digital opportunities

Boomi Platform Services

- ✓ **Integration.** Connect applications, data, and things faster with pre-built integrations and the guidance of over 200 million crowdsourced integrations powered by machine learning.
- ✓ **API Management.** Create and configure APIs, expose real-time integrations, control and govern data access, and support the entire lifecycle of APIs in any environment effortlessly.
- ✓ **B2B/EDI Management.** Modernize your trading partner network with cloud-native integration with your business-to-business/electronic data interchange (B2B/EDI) ecosystem while ensuring security, compliance, and end-to-end visibility.
- ✓ **Master Data Hub.** Get a comprehensive 360° view of any data domain to drive faster, more confident decision-making.
- ✓ **Flow.** Build applications and automate workflows with low-code technology to make digital experiences happen quickly, securely, and at scale.
- ✓ **Event Streams.** Create high-performance, event-driven integrations with guaranteed delivery and ordering, at scale and in real time.
- ✓ **Boomi AI.** Harness the power of generative AI to integrate and automate faster, so you can democratize innovation and accelerate business outcomes that change the future.
