VALUE PROPOSITION

1

DATA MIGRATION SERVICES

We deliver the last but fatal step of a successful system implementation and data transformation journey

2

SaaS VALIDATION Service

Ensuring compliant implementation and operations of your SaaS Applications

3

GxP Digital Signature Service

Within a complete service, we ensure a fast and high- quality assessment and implementation of fully validated GxP Digital Signatures suiting your needs

DAQUMA TOOL CHAIN

MAKING IT POSSIBLE TO SEAMLESSLY MOVE
DATA FROM SOURCE TO TARGET SYSTEM

DATA PROFILER

Provides a data quality profile for assessing anomalies in the migration scope. Configured for automation and assessing adherence to standards.

DAQUMA ETL

Stores and executes extract, transform and load in a configurable solution. Our software is used on several migrations for the Life Science industry.

DAQUMA VALIDATION

Verifies that scope is delivered as detailed in the migration configuration. Tests that content is migrated correctly for all migrated records.

VEEVA PARTNERSHIP

Daquma has a primary focus on clients in the **CP&C and Pharma Segment**. Our consultants have extensive experience working on Veeva implementations and we are certain that we can offer the competencies of a tier-1 consultancy at competitive pricing. Further, we are European based with the ability to support locally.

Following are the **Veeva Product focus areas** that we have extensive experience within:
