

How fast can a life sciences organization move with innovative information technology at the core of every action? What if routine, regulated tasks across departments and continents were automated? What if business insights soared from thoughtfully managed AI data and algorithms that fueled confident business decisions? What if the scientific discovery was made safer and faster without fearing an imminent FDA audit?

At USDM Life Sciences, our purpose is to bring clarity and action to the interplay of technology and regulations to help biotech, pharma, and medical device companies deliver trailblazing outcomes. We help our customers utilize cutting-edge technology to increase their speed to market while ensuring continuous compliance and patient safety.

LIFE SCIENCES EXPERTISE	COMPLIANCE SIMPLIFIED	GxP TECHNOLOGIES

From strategy and execution to digital quality management and quality assurance, USDM has solutions that connect technology, people, and processes throughout your organization. We offer a range of delivery models from managed services to strategic consulting to staff augmentation—whatever it takes to meet your business needs.

USDM helps you implement a GxP-compliant framework for every layer of your cloud tech stack and maintains your ongoing validation so you can focus on innovating. We have two trusted, propriety solutions for continuous compliance and process automation.

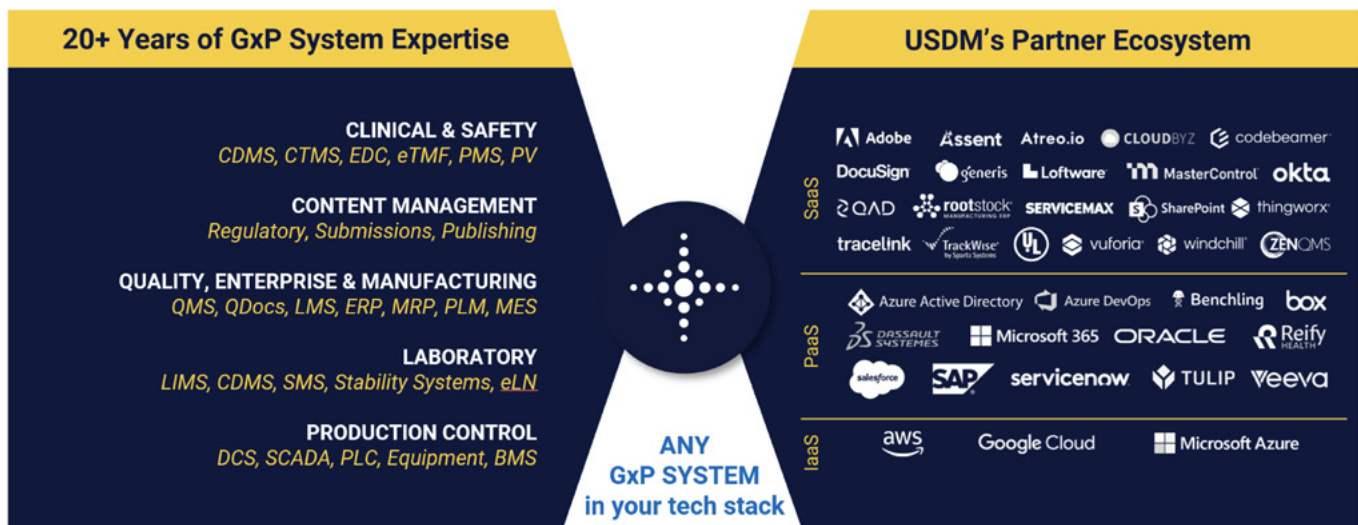

Cloud Assurance as a Platform	ProcessX™
<p>Cloud Assurance as a Platform (CAaaP) implements automated regression testing for releases and patches, manages your validation documentation and artifacts, and runs scripts in your GxP system environment to keep you continuously validated and always audit ready.</p>	<p>ProcessX automates any GxP or non-GxP workflow in your tech stack to automate and streamline operations. It accelerates change management, Validation Lifecycle Management (VLM), and Application Lifecycle Management (ALM) with AI, providing a single source of truth.</p>

With the power of CAaaP and ProcessX, you can achieve automated, paperless processes to optimize your workforce and drive better data-driven decisions.

GxP Technology We Support

We can manage any GxP system in your tech stack—on prem or cloud systems. Our domain knowledge coupled with our technology expertise provides the foundation for unmatched GxP managed services and proprietary software solutions.

USDM is your one-stop shop for your GxP technology and compliance needs.
