

Train Sponsors, CROs, and Sites in One Application

Clinical studies are reaching new levels of complexity and scale, with an average study now requiring hundreds of personnel spread across multiple countries. Using disparate systems to manage study training across large, dispersed teams over the course of a study duplicates efforts, reduces visibility, and increases compliance risk.

Veeva Study Training brings sponsors, CROs, and research sites into a single platform to streamline and automate training while ensuring inspection readiness. With connectivity to Veeva Clinical Operations, Veeva Study Training improves training creation, assignment, and delivery. Pre-configured reports and automated alerts for new and updated curricula drive greater visibility, oversight, and compliance.

Business Benefits

 **Streamline and automate study training** by bringing sponsors, CROs, and research sites into a single platform.

 **Ensure inspection readiness** by eliminating manual trackers and generating inspection-ready training certificates.

 **Improve compliance** with automated training alerts and on-demand curricula access for study personnel.

 **Improve oversight** with unified reporting across sponsors, CROs, and sites.

Features

- ✔ **Single Platform for All Study Personnel**
Manage study training curricula for sponsors, CROs, and research sites in one streamlined platform.
- ✔ **Quizzes and Assessments**
Ensure competency with flexible, easy-to-configure quizzes that provide immediate feedback to remediate incorrect answers.
- ✔ **Seamless Connection with Veeva Clinical Operations**
Leverage connected clinical master data and version-controlled documents from Veeva Clinical Operations to automate and streamline study training.
- ✔ **Unified Reports and Dashboards**
Monitor oversight and compliance in real-time with pre-built dashboards and reports, or build your own.
- ✔ **Automated Training Assignment and Distribution**
Use automated alerts for new or updated curricula to ensure study and site teams stay current with training, including protocol training.
- ✔ **Compliance and Validation**
Drive compliance with audit trails, e-signatures, validation processes, and configurable business logic designed in a strict change control environment.
- ✔ **Digital Matrix for Training Assignments**
Quickly assemble a training matrix for each study and assign training by study team role and individual responsibilities.

About Vault Clinical Operations

Vault Clinical Operations empowers clinical teams with a unified platform for efficient trial execution. Streamlining processes and improving data visibility from start-up through closeout accelerates timelines and enhances collaboration across sponsors, sites, and CROs.
