## OUR SERVICES

### **Computerized System Validation (GxP)**

Ensuring compliant implementation and validation of your SaaS Applications and post-go live quality operations.

### **Data Governance**

Ensuring structured and compliant data management of your key business procedures and data

### **Data Migration Assessment**

Allowing you to assess migration scope, requirements and approach in a quick and structured approach

### **GenAI Assessment for regulated systems**

Extract insights from regulated systems with the help of DAQUMAs integration platform connecting regulated systems with LLMs.

### **Data Migration**

The final but fatal step of the system implementation and data transformation journey.

### **All-in-one System Implementation**

With a partnered setup, we ensure a fast and high-quality implementation of new systems in customer environments.
