

Accelerate Your Veeva Vault Journey

End-to-end support
from strategy to
optimization

Powered by PLG's
Veeva Center of
Excellence

Your Partner for Veeva Success

Supporting Quality, Regulatory, Clinical, and Safety Vaults across the full product lifecycle.

PLG's Veeva Center of Excellence helps life sciences organizations accelerate and maximize the value of their Veeva Vault investment.

From early strategy through implementation and long-term operations, we combine deep industry expertise with hands-on system knowledge to deliver scalable, compliant, and business-driven solutions.

Whether you are starting your Veeva journey or optimizing existing vaults, we act as an extension of your team — bridging business and IT to ensure successful outcomes at every stage.

Our approach combines strategic advisory, deep functional expertise, and hands-on delivery — ensuring value beyond implementation.

End-to-End Veeva Services

We support the full lifecycle of your Veeva Vault journey:

Advisory

Define the right strategy for your Veeva roadmap
Align business processes with industry best practices
Set the foundation for scalable, future-ready solutions

Implementation

Deliver scalable, compliant Veeva solutions
Translate business needs into effective system design
Drive adoption through training and support

Validation

Ensure GxP compliance from day one
Implement robust validation strategies
Safeguard data integrity and regulatory readiness

Migration

Execute seamless, low-risk data migrations
Ensure accuracy, completeness, and traceability
Accelerate time to value

Managed Services

Optimize and support your vaults post go-live
Drive continuous improvement and system performance
Ensure long-term business value

How We Deliver Value

Phase 1 Strategy & Preparation Set the foundation for success

Key Activities

- Assess current processes, systems, and challenges
- Define project scope (stakeholders, data, processes)
- Evaluate fit with Veeva best practices (out-of-the-box vs customization)
- Establish governance, roles, and delivery model
- Define high-level implementation, validation, and migration strategy

We prepare your organization for a successful Veeva implementation by aligning business, technology, and delivery strategy.

Outcome

A clear, aligned roadmap and an organization ready for project kick-off

Phase 2 Implementation & Configuration Build a scalable, compliant Veeva solution

Key Activities

- Lead workshops to capture and refine requirements
- Translate business needs into system configuration
- Guide alignment with Veeva standard functionality
- Support configuration decisions and trade-offs
- Track requirements and ensure full coverage
- Prepare for validation and testing

We translate business requirements into an effective system design, ensuring alignment with best practices and long-term scalability.

Outcome

A configured solution aligned to your business, optimized for performance and future scalability

Phase 3 Validation, Integration & Go-Live Deliver a compliant, business-ready system

Key Activities

- Develop and execute validation strategy (CSV)
- Author and manage validation documentation
- Support UAT, PQ, and defect management
- Coordinate integrations and data flows
- Prepare migration and master data strategy
- Plan and support go-live execution

We ensure your Veeva Vault is validated, integrated, and ready for a smooth transition to production.

Outcome

A clear, aligned roadmap and an organization ready for project kick-off

Flexible Delivery Models

We adapt to your organization's needs, offering the right level of support.

Choose the delivery model that best fits your organization and internal capabilities:

■ PLG-Led Delivery

- We manage the entire project from planning to execution
- You benefit from a fully outsourced, expert-driven approach

■ Joint Delivery

- We collaborate closely with your team
- Combining your business knowledge with our Veeva expertise

■ Customer-Led Delivery

- You lead the project with our guidance and support
- We provide best practices, expertise, and quality assurance

No matter the model, our goal remains the same:

Delivering efficient, compliant, and sustainable Veeva solutions

Trusted Experience

Trusted by life sciences organizations of all sizes — from emerging biotech to global enterprises — across Quality, Regulatory, Clinical, and Safety.

200+
successful migrations

150+
migrations into Veeva Vault

20+ years
of experience in data
migration and transformation

Our approach combines:

- Deep expertise in GxP-regulated environments
- Strong functional and technical capabilities
- Focus on long-term value, not just delivery
