

TCS at Veeva R&D and Quality Summit

- May 28-29, 2026
- Copenhagen, Denmark

The Veeva R&D and Quality Summit is a two-day event on trends shaping the future of R&D and quality functions in life sciences. TCS is thrilled to be a part of this incredible event, which will typically see participation from over 200 life sciences companies.

As a Veeva Systems partner for over a decade, TCS' broad portfolio of solutions, home-grown tools, and frameworks help life sciences companies accelerate the adoption of Veeva solutions. We are preferred partners for Veeva Systems in Veeva Commercial Cloud and Veeva Development Cloud. Currently, we serve more than 20 customers globally, offering end-to-end services both in Veeva Commercial and Veeva Development Cloud.

Our scope of services includes advisory and consulting, implementation and support, migration, maintenance and support, testing and validation. With rich contextual knowledge about our customers, mature processes and a strong team of certified experts, we are well poised to help transform your journey with the Veeva suite of products.

We look forward to showcasing TCS' capabilities and proven successes for Veeva products
