

fme: Your Global Veeva Partner

Certified migration and technology partner for Veeva solutions

Why Trust fme with Your Veeva Vault Migration?

fme Life Sciences is a leading provider of business and technology services for the Life Sciences industry, and a Veeva-certified services and technology partner. Our team of experts specializes in quality, regulatory, and clinical data migration, and is well-versed in the unique challenges, stringent regulatory requirements including GxP compliance, and powerful capabilities of the Veeva platform.

fme understands the integrity and accessibility of your data and documents in your new system are paramount. With detailed planning and skilled execution, we minimize the timeline and risks of your migration to the Veeva platform to maximize the value of your technology investment. Our certified services and technology make us uniquely qualified to handle the nuanced needs of your migration to Veeva Vault.

Veeva-Certified Experts

Through successful migrations with life sciences companies around the globe and rigorous evaluations by the Veeva Partner program, fme has earned both product and service certifications. Our purpose-built tools and proven methodologies ensure your migration to Veeva Vault is smooth, secure, and compliant with minimal disruption.

End-to-End Migration Services

Our end-to-end services cover every phase throughout the complete migration journey:

- Requirements evaluation and solution selection
- Content extraction, analysis & organization
- Migration planning and preparation
- Data and document transformation & mapping
- Data transformation testing, validation & correction
- Data and content import
- Post go-live system health checks & technology support

Our proven methodologies and purpose-built technologies allow us to address your unique needs, and deliver the right-fit solutions required to streamline, simplify, and de-risk your migration journey. Customize a solution for your needs:

- **Migration to Veeva Vault-as-a-Service** – fme can plan and manage your entire migration project in a full service experience.
- **Onboarding to Veeva Vault Cloud** – End-to-end migration from legacy or outdated on-premise solutions to Veeva, including a reusable migration framework.
- **Mergers & Acquisition Migrations** – Integrate/consolidate large amounts of data and documents ensuring legal and audit-compliance without system downtimes.
- **Data Cleansing & Metadata Enhancement** – A tailored service to enhance the quality of metadata for faster retrieval and improved compliance.

migration-center®

The Power Behind Our Migrations

fme's purpose-built migration tool **migration-center** delivers step-by-step, highly automated migrations without system downtime, simplifying even the most complex migrations with no volume restrictions. Capable of supporting over 250 source-to-target system combinations, migration-center seamlessly handles content extraction and migration to Veeva Vault from databases, file shares, cloud platforms, Vault to Vault, and legacy applications. No matter where your data resides, we can migrate it efficiently and accurately to Veeva Vault. migration-center delivers:

- **Veeva Certified** – migration-center is Veeva-certified for data and document migration to Veeva Vault including Vault Submissions, Vault eTMF, Vault QualityDocs, and more.

- **Performance and Scalability** – Analyze, organize and de-dupe your data with no volume restrictions and guaranteed high performance using multiple and parallel data set processing within migration-center's efficient architecture.
- **Delta Migrations without Business Interruption** – Execute migration activities on live data without affecting daily business operations with migration-center's successive delta scanning capability.
- **Connect to Any Application** – Connect to virtually any system via the migration-center Framework and API, or use the out-of-the-box connectors for leading applications like OpenText Documentum, Microsoft SharePoint, Veeva Vault, Hyland OnBase, file shares, and many more.
- **Proven to Save Time and Minimize Costs** – Certified by leading ECM vendors, migration-center saves 60% in costs and 80% in project duration. It has been used in thousands of migration projects and continually refined since 2005.
