

# Vault Registrations

## Global product registrations, health authority interactions, and commitments

In many organizations, regulatory teams track product registrations on multiple spreadsheets or in complex legacy tools that are not globally accessible. Headquarters often lacks visibility into local affiliate operations and health authority interactions, so it must manually aggregate product status information, which can cause delays and introduce data discrepancies.

Veeva Vault Registrations enables companies to plan, track, and report on global product registrations and health authority correspondence and commitments within a single system. It includes powerful tools to help teams quickly assess the impact of manufacturing or labeling changes so they can make more informed decisions throughout the product lifecycle.

With a flexible data model, Vault Registrations also helps companies capture the information they need to meet global regulations like EU MDR/IVDR, US, or other global UDI regulations. As regulations continue to evolve, Veeva is committed to adding data fields, enabling new features, and pulling in information through its open API to support customers and provide resilience over time.

### Benefits

- **Improved data quality:** Streamline registration management by reducing data duplicates and discrepancies.
- **Global visibility:** Stay informed with complete visibility into the marketing status of your global product portfolio.
- **Faster responses to health authorities:** Track product registration queries and commitments to stay ahead of response deadlines.
- **Unified RIM:** Connect end-to-end regulatory processes and improve efficiency as part of the Veeva Vault RIM Suite.

## Features

### Global Product Registrations

Manage registration information for marketed products and investigational devices including unique device identifiers (UDIs), device classifications, indications, packaging specifics, and manufacturing details. Manage license updates and renewals and report on the latest approved details.

### Health Authority Interactions and Commitments

Retain and classify all correspondence with health authorities. Create commitment records with related tasks and report on progress against outstanding commitments and deliverables.

### Change Management

Track proposed changes to global registrations. Determine the impact of a proposed change and delegate actions to local affiliates to execute the change in their market. Optionally, leverage a seamless connection with **Veeva Vault QMS** to automate the creation of any planned change triggered by your quality change control process.

### UDI Support

Capture the data needed for day-to-day operations and to utilize that data in different ways. Be ready to publish data in multiple formats, such as EU MDR/IVDR, US, or other global UDI regulations.

### Dashboards and Reports

Create easy, self-serve reports showing information by any combination of attributes including product, application, region, manufacturer, and more. Address any bottlenecks or delays by re-assigning tasks or sending reminders directly from within the report.

### Affiliate Home Page

Encourage local user adoption with a specific user interface that allows market product owners to view all country-specific data points in a simple graphic format with quick-launch buttons to update local data (pictured below).

## Veeva Vault RIM Suite

Vault Registrations is part of the **Veeva Vault RIM Suite**, which streamlines global regulatory processes on a single, cloud-based platform. This enables medtech companies to::

- Ensure teams are developing reliable regulatory content with high data integrity
- Coordinate regulatory efforts across headquarters, affiliates, and partners
- Respond faster to changing regulations
- Increase end-to-end process efficiency from submission planning to publishing
