

VeCOA

VeCOA simplifies the design, management, and completion of electronic Clinical Outcome Assessment (eCOA), with seamless data flow that ensures access and transparency throughout clinical studies.

This delivers high quality patient data when you need it, where you need it through a modern platform built for the unique needs of sponsors, sites, and patients.

The screenshot shows the VeCOA platform interface. At the top, there is a search bar and a 'Library' tab. Below the library, a list of surveys is shown:

Survey Name	Count	Action
Patient Global Assessment of Arthritis	3	+
Daily Wellness Survey	7	+
Weekly Injection Diary		To Do
Dermatology Life Quality Index		Today
Migraine Log		

Below the survey list, a survey form is displayed for the 'Daily Wellness Survey'. The form title is 'Rate your pain over the past 24 hours'. It features a 10-point Likert scale with faces from 'No Pain' to 'Extreme Pain'. The scale is currently at position 2.

Benefits

Accelerate Study Design and Execution

Build, manage, and change studies faster with a modern designer and full reusability across studies.

Access High-Quality Data Faster

Ensure data is accurate, complete, and readily available from study design to close out.

Improve Patient Experience

Make eCOA completion easier with a single user-friendly app to access all study activities.

Features

eCOA Library

Accelerate study design through a library of reusable and validated eCOAs, sourced from both Veeva and sponsor libraries.

Supports Range of Question Types

Incorporate required question options including multiple choice, numerically rated scales (NRS), and visual analogue scales (VAS).

Branching Logic

Only include relevant questions to simplify eCOA completion and enhance patient experience.

Patient and Site Notifications

Notify patients of eCOAs requiring completion and alert sites if they are uncompleted or missed.

Enhanced Login Options

Users can login with a username and password, PIN, or choose to activate biometric authentication (fingerprints and facial recognition).

Optimized for BYOD

Patients can use their own device including android, iOS, and web.

Real-time Data Access

Sites and study teams can access patient-entered data, including adherence, in real-time in the systems they work within – no more data silos.

Amendments and Version Control

Seamlessly manage amendments to the study design which are version controlled and automatically provided to sites.

End-to-end Platform

Unified system seamlessly connecting sponsors, sites, and patients across the entire eCOA process.

Validated and Secure Cloud Platform

Veeva eCOA is fully validated by Veeva and supports compliance with HIPAA and regional data privacy requirements.

Veeva Clinical Platform

The Veeva Clinical Platform is the first eClinical platform offering EDC, CDB, eCOA, eTMF, CTMS, Payments, Site Connect, Study Training, and RTSM on one enterprise-class cloud platform. For the first time, medtech companies can connect clinical operations and data management with a unified platform to create a single source of truth and streamline clinical trials from study startup to close.
