## PRODUCT SHEET

# Link Key People

Link Key People provides deep data about key opinion leaders (KOLs) and software to view it. Medical and commercial teams use the product to identify KOLs, view their activities, and receive notifications.

Curated KOL profiles include publications, clinical trials, conferences, associations, guidelines, grants, payments, social media, and news mentions. Data is sourced from over 250k public sources, including PubMed, conference websites, and social media feeds.

Customers access the data via a web application, mobile app, APIs, and connectors to CRM and Events Management. The product is available across 85+ countries and all major therapeutic areas.
