

FOR IMMEDIATE RELEASE

## New Veeva Vault CTMS to Transform Clinical Operations as the Industry's First Unified Cloud Solution

*Veeva to deliver the only clinical suite that unifies CTMS and eTMF  
for one process, one system, and one view across clinical trials in the cloud*

**PLEASANTON, CA – June 22, 2016** – [Veeva Systems](#) (NYSE: VEEV) today introduced [Veeva Vault CTMS](#), the industry's first multitenant cloud application that unifies information, documentation, and processes globally for a single source of truth across clinical operations. Together with [Veeva Vault eTMF](#), Veeva will offer the first and only suite of clinical applications that combines CTMS and eTMF on one cloud platform. Now life sciences companies can accelerate trial execution and gain real-time visibility into their clinical operations.

"The clinical development process is highly inefficient due to a number of factors, including the inconsistent use of a large number of disparate and incompatible technologies," said Ken Getz, associate professor at Tufts University School of Medicine and chairman of the Center for Information and Study on Clinical Research Participation. "Transparency, compatibility, and integration are critical factors driving technology solutions adoption among clinical research professionals, patients, and the broader health care environment."

The fragmented landscape in clinical operations stems from duplicate content and data in multiple systems across many processes in a growing, complex global ecosystem of stakeholders. System and process silos create challenges for operations leaders to plan and make informed decisions during clinical trials.

"Veeva is bringing the next generation of clinical trial management to life sciences," said Jennifer Goldsmith, senior vice president of Veeva Vault. "We are filling a significant gap in the industry with a unified suite of applications to provide one process, one system, and one view within and across clinical trials. For the first time, life sciences companies will be able to get full visibility into their clinical operations."

Veeva Vault CTMS will help life sciences companies unify their clinical trial operations to reduce complexity, increase transparency, and speed time-to-market by providing:

- **One source for clinical master data** – ensure high-quality data across clinical applications with one system of record for study, study country, and study site information
- **Real-time visibility** – make faster, more informed decisions with a comprehensive, accurate view into the performance and efficiency of clinical trials
- **Seamless access** – enable collaboration across critical stakeholders from sponsors to CROs to investigator sites with a single solution in the cloud
- **A true cloud solution** – always current with the latest system capabilities without disruptive upgrades that can impact trial execution

In a recent survey of eTMF owners, 49% cited integration between their eTMF and CTMS applications as a key need. Veeva Vault CTMS joins Vault eTMF and [Veeva Vault Study Startup](#) as part of the Vault Clinical Suite designed to unify clinical operations. Vault CTMS is the latest application built on [Veeva Vault](#), a cloud platform and suite of applications specifically built for life sciences. Traditionally, companies deploy multiple applications to manage content and the associated data. Veeva Vault is the only content management platform with the unique capability to manage both content and data. Now life sciences companies can eliminate system, site, and country silos and streamline their end-to-end clinical processes.

Vault CTMS is expected to be available in the first quarter of 2017.

## **About Veeva Systems**

Veeva Systems Inc. is a leader in cloud-based software for the global life sciences industry. Committed to innovation, product excellence, and customer success, Veeva has more than 400 customers, ranging from the world's largest pharmaceutical companies to emerging biotechs. Veeva is headquartered in the San Francisco Bay Area, with offices in Europe, Asia, and Latin America. For more information, visit [veeva.com](http://veeva.com).

## **Forward-looking Statements**

This release contains forward-looking statements, including the market demand for and acceptance of Veeva's products and services, the results from use of Veeva's products and services, and general business conditions, particularly in the life sciences industry. Any forward-looking statements contained in this press release are based upon Veeva's historical performance and its current plans, estimates, and expectations, and are not a representation that such plans, estimates, or expectations will be achieved. These forward-looking statements represent Veeva's expectations as of the date of this press announcement. Subsequent events may cause these expectations to change, and Veeva disclaims any obligation to update the forward-looking statements in the future. These forward-looking statements are subject to known and unknown risks and uncertainties that may cause actual results to differ materially. Additional risks and uncertainties that could affect Veeva's financial results are included under the captions, "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the company's filing on Form 10-Q for the period ended April 30, 2016. This is available on the company's website at [veeva.com](http://veeva.com) under the Investors section and on the SEC's website at [sec.gov](http://sec.gov). Further information on potential risks that could affect actual results will be included in other filings Veeva makes with the SEC from time to time.
