

# Veeva Vault

## Regulated Content and Data Management in the Cloud

### Always Current, Constantly Innovating

Veeva Vault is a cloud-based content management platform and suite of applications that provides life sciences companies a single source of truth to reduce complexity and increase business agility. Veeva Vault not only manages regulated documents, but also tracks critical information from product development to commercialization. Managing this unique combination of documents and data, organizations improve efficiency and gain deeper insight.

#### Access

Connecting all parties globally promotes and streamlines collaboration. Quickly provide secure access to internal and external users – incorporating all stakeholders into key processes and enabling greater visibility, and control.

#### Visibility

In any regulated environment, it is critical to know what content exists, what state it is in, and where it is used. Vault's real-time reporting and dashboards empower managers with information for faster decision-making to help identify and remedy process bottlenecks, track progress, and gain visibility into readiness.

#### Control

Veeva Vault simplifies compliance by providing the functionality you need with unparalleled ease-of-use. Easily gain control over document and data processes with capabilities such as versioning, e-signatures, and controlled workflows. Vault also automates manual steps and keeps collaborators on-task to improve efficiency.

## V Vault Clinical Suite

### Vault CDMS

Vault CDMS streamlines clinical data management and accelerates study execution by combining EDC, coding, data cleaning, and reporting in a single cloud application. Companies can manage study build through execution on Vault CDMS and gain a complete and concurrent view of all their clinical data.

### Vault CTMS

Vault CTMS makes it easy for life sciences companies to unify clinical information and processes, streamline trial management, and gain complete visibility across the trial portfolio.

### Vault eTMF

Vault eTMF enables active TMF management for real-time inspection readiness, visibility, and control. Sponsors can oversee trials more effectively, while CROs gain the flexibility to manage eTMF. Auditors and inspectors get easy online access, from anywhere and on any device.

### Vault Study Startup

Vault Study Startup connects global teams and enables best practices for managing country and site startup processes. Content-intensive startup processes and milestone maintenance activities are managed in a single system, providing unparalleled insight and efficiency.

## V Vault Quality Suite

### Vault QMS

Modernize quality management with Vault QMS. Easily accessible by internal and external parties, Vault QMS supports proactive management initiatives, deviations, audits, complaints, lab investigations, change control, CAPA, and supplier qualification processes, or configure your own.

### Vault QualityDocs

Vault QualityDocs simplifies management of quality, manufacturing, validation, and other GxP documents. Internal and external users collaborate real-time without downloading documents, and gain visibility into document workflows and read and understood tasks to mitigate risk.

### Vault Training

Vault Training streamlines training from creation to distribution and completion, and enables easy management of role-based qualification for job and audit readiness. With centralized training records, organizations can quickly demonstrate compliance and stay inspection ready.

## V Vault RIM Suite

### Vault Registrations

Vault Registrations is a global application for tracking product registrations and managing health authority interactions. Make better informed decisions and respond faster to health authorities based on Vault Registrations' real-time visibility and actionable insights.

### Vault Submissions

Vault Submissions unites contributors, partners, and affiliates in the cloud with a single destination for regulatory documents. Create global and regional submission dossiers to harmonize the planning process and provide real-time visibility into submission readiness.

### Vault Submissions Publishing

Dramatically speed submissions delivery. Vault Submissions Publishing incorporates publishing functionality within the Vault RIM Suite to provide end-to-end submission development on a single platform. Use a continuous publishing process to create, validate, and submit eCTD dossiers.

### Vault Submissions Archive

Vault Submissions Archive is an authoritative source for submission and correspondence that enables faster, more accurate interactions with health authorities around the world. Find the right documents quickly leveraging dynamic access control, powerful search, and an integrated viewer.

---

## V Vault Platform

Veeva Vault is the first cloud platform built from the ground up to meet the rigorous content management requirements of the life sciences industry. With a modern user experience and uniquely designed for both content and data on a single platform, organizations can seamlessly manage end-to-end processes.

The Vault Platform leverages the latest in cloud technology and is delivered and accessed through the web for greater ease-of-use. Hosted at SOC I Type II and ISO 27001 certified global data centers, every release is IQ and OQ qualified reducing the validation efforts.
