

FOR IMMEDIATE RELEASE

Veeva Vault Safety Now Available

Veeva delivers a modern cloud application for the management of adverse events

PLEASANTON, CA — June 24, 2019 — Veeva Systems (NYSE:VEEV) today announced the availability of **Veeva Vault Safety**, a modern cloud application that provides real-time management of adverse events. To date, four early adopters have already selected Vault Safety, including Apellis Pharmaceuticals and Catalyst Clinical Research.

“It’s a significant burden to configure and maintain safety systems and stay up-to-date with evolving regulations,” said Lisa Hornick, CMO of Catalyst Clinical Research. “Veeva Vault Safety provides a modern solution that streamlines safety management for improved compliance and stronger collaboration with partners.”

Vault Safety ensures drug safety and pharmacovigilance organizations stay current on regulatory changes across global agencies through ongoing innovation, while eliminating the costly and time-consuming upgrades of legacy on-premise safety solutions. Real-time reporting and interactive dashboards provide complete visibility into case status. In addition, simplified collaboration and integration enable organizations to seamlessly share data across all stakeholders, both internal and external, driving operational efficiencies and improved compliance across sponsors, CROs, and partners.

“Traditionally, safety management solutions are cost prohibitive and awkward for emerging pharmaceutical and biotechnology organizations,” said Brian Longo, SVP and GM of Veeva Vault Safety. “With Veeva Vault Safety, the cloud eliminates these barriers, enabling organizations of any size to own and control their safety solution.”

Vault Safety is a cloud service that is inclusive of all technology and business continuity operations. As part of **Veeva Development Cloud**, along with **Vault Clinical**, **Vault Quality**, and **Vault RIM**, Veeva offers the life sciences industry’s most comprehensive suite of unified cloud applications to speed drug development.
