ACADIA Launches Collaborative Authoring with Speed

Vault — Easily adapted training materials from Office Online to collaborative authoring

Developed experts within RegOps to answer questions and provide support

Took 2-3 weeks to go from sandbox to production

Continue to be proactive and make technology part of the discussion with teams

"We're using workflows pretty much as the main way that we do collaborative authoring. And **we do all the reviewing now with Office 365**. So, we've almost entirely moved away from the idea of the PDF annotation based review and we're using it across the board with workflows every single time."

- Mike Epstein, Senior Director of Regulatory Operations
