Alvotech Improves GxP Training Efficiency and Effectiveness with Veeva Vault Training

Unified quality solution automatically assigns role-based training upon approval of standard operating procedures

Alvotech is a rapidly growing biotech focused on delivering high quality, cost competitive products to patients worldwide. To set new standards in biosimilar medicines, the company needed to improve the efficiency and effectiveness of GxP training. Alvotech’s standalone learning management system did not allow for automated curriculum development or training assignment based on SOP changes and other quality events. Instead, training administrators had to track updates to controlled documents and then revise curricula and training assignments manually—an inefficient process that increased operational overhead and the risk of noncompliance.

Automated training assignments replace manual processes

Alvotech saw the opportunity to bring together training and quality documents in a single system to streamline document and training management. The company extended its Vault QualityDocs implementation with Vault Training, improving the efficiency and effectiveness of GxP training. The built-in automation enabled by unification allows Alvotech to create documents, deliver training, and track progress in the same workflow. For example, when Alvotech’s quality team approves a revised SOP, the system automatically generates a new training task for all relevant employees and cancels any open tasks for the superseded version. In this way, Alvotech ensures that GxP training remains tightly aligned with qualification requirements.

This vision of unified quality is appealing. All processes are in one system, which allows for automation to be baked into the standard product.

Andres Nielsen, Quality Management, Alvotech

ALVOTECH – AT A GLANCE

- Corporate Headquarters: Reykjavik, Iceland
- Employees: 550+
- Primary Therapeutic Area: Biosimilar medicines
Alvotech uses Vault Training to manage blended curricula of documents and videos. Flexible training matrices allow the company to assign training based on roles, improving training and quality outcomes. Digital completions are captured using read and understand, attendance verification, and other mechanisms to ensure a complete learning record. At any time, employees and managers can easily see what training is required to perform a specific function and the current training status.

**Success Highlights**

- Automated training assignment
- Complete view of training status
- Increased role readiness
- Lower administrative burden

**Linking training and QMS processes**

The company also plans to replace paper-based competency assessments with Vault Training’s online quizzes. In addition, Alvotech plans to leverage linkages between Vault Training and Vault QMS to easily trigger training as part of corrective and preventive action (CAPA) workflows. With unified training across the Vault Quality Suite, Alvotech can further improve training outcomes, efficiency, and compliance.

**About Veeva Systems**

Veeva Systems Inc. is the leader in cloud-based software for the global life sciences industry. Committed to innovation, product excellence, and customer success, Veeva serves more than 900 customers, ranging from the world’s largest pharmaceutical companies to emerging biotechs. Veeva is headquartered in the San Francisco Bay Area, with offices throughout North America, Europe, Asia, and Latin America. For more information, visit veeva.com.
