

Fast and Unified Digital Validation Management

Veeva Validation Management is a unified digital solution for faster, accurate validation. It reduces bottlenecks with optimized and automated workflows for commissioning, qualification, and validation activities across computerized systems, facilities, utilities, equipment, and manufacturing processes. Reducing validation cycle times, it minimizes time and effort by:

- Simplifying inventory tracking, standardizing requirements management, and automatically closing change action, managing project deliverables from creation to closure.
- Making it easier to author and run test scripts with seamless integration to automated testing tools.
- Automating the traceability matrix and surfacing relationships between requirements, specifications, risk, and testing.

Validation Management is unified with Veeva QualityDocs and Veeva QMS to ensure compliance and reduce manual updates, connecting workflows and enabling end-to-end process visibility and controls. It optimizes performance across systems, equipment, processes, sites and ensures continuous validation with a unified data foundation and real time reporting.

Top Features

Modernize digital management of commissioning, qualification and validation activities

Reduce bottlenecks with automated workflows across the validation lifecycle. Optimize performance across systems, equipment, processes, sites and ensure continuous validation.

Unify validation and quality management

Ensure compliance and reduce manual updates with unified Validation Management, QMS and QualityDocs to connect workflows and enable end-to-end process controls.

Validation intelligence with a single source of truth

Gain complete visibility into validation projects, deliverables, and activities across the organization with intuitive workflows, reports and dashboards that surface key metrics about the validation inventory, deliverables, test discrepancies, due dates and open tasks.

Modern test script pre-approval, execution, review, and post-approval

Eliminate manual errors and increase your team's capacity with a fully digitized test authoring, dry-runs, pre-approval, execution, review, and post-approval process.

Digital Validation Data Foundation

Ensure higher quality data is accessible for risk management, analysis, automation and AI with a structured and standardized data model.

Business Benefits

Faster cycle times

Ensure compliance and data integrity

Improve visibility and reporting

Efficiency and control

About Veeva Quality Cloud

Veeva Quality Cloud accelerates the manufacturing of high-quality products to a greater number of patients. The cloud platform unifies applications, processes, and partners across content management, training, quality management systems (QMS), and QC lab solutions (LIMS).
