**Veeva** Quality Cloud

Unify Quality With Veeva Quality Cloud

Veeva Quality Cloud enables efficient quality management for QA, QC & training across GxPs and partners. By modernizing systems and simplifying quality processes in a single platform, organizations can accelerate the development and manufacturing of high-quality products to more patients.

Traditional quality silos and legacy systems limit speed to market and global operations. Site-specific processes, manual workflows and disconnected systems reduce efficiencies, create inconsistencies in execution, increase training burdens, and constrain collaboration.

Foundation of Data

Increase Speed to Market | Scale | Create Efficiency | Ensure Compliance

Veeva Quality Cloud unifies QA, QC and training in one platform to accelerate quality processes, create efficiencies, and ensure consistent compliance across sites, partners and global teams. With built-in automation, best practices, and data for analytics and AI, it is a foundation for proactive quality management.

The platform unifies applications which can be used alone or together: quality management system (QMS), content management, training (LMS), lab management (LIMS), validation management and batch release.

Capabilities

✓ **Remove operational silos**

Reduce cycle times, modernize processes and consolidate legacy applications by connecting and managing all quality processes, content, events and data in a unified cloud platform.

✓ **Create efficiency and ensure compliance**

Ensure consistent, efficient and compliant quality operations across sites— including CAPAs, change control, complaint handling, supplier management, lab investigations, training, and more.

✓ **Drive deeper collaboration across the value chain**

Improve communications and partner collaboration with visibility into change controls, SCARs, supplier change notifications and more.

✓ **Build a data foundation for analytics, automation, and AI**

Make timely decisions, optimize metrics and drive proactive quality with a standardized data foundation for advanced analytics, automation, and AI.

✓ **Maintain competency-based training**

Enable employees with an efficient training process that manages curriculum and GxP requirements. Connect training and quality documents to deliver the most up-to-date content in your training program.

About Veeva Quality Cloud

Veeva Quality Cloud enables the management of quality events from event origination to changing controlled content and completing training on a single cloud-based platform. Connecting quality processes, critical documentation, and training—with Veeva QMS, Veeva QualityDocs, and Veeva Training—accelerates and streamlines event identification, correction, and change management. This end-to-end visibility equips organizations to respond to quality events faster, and provides a complete picture of quality management activities to regulators.
