

# Increase efficiency and gain oversight of pharmacovigilance agreement obligations

Veeva SafetyDocs enables more efficient management of pharmacovigilance agreements (PVAs) and safety data exchange agreements (SDEAs) and provides oversight of PVA/SDEA obligations.

With secure access and customizable workflows, Veeva SafetyDocs makes it easier to collaborate with external partners, manage multiple PVAs/SDEAs globally, and track obligations for improved compliance.

## Business Benefits

### Improve partner adherence.

Gain oversight of partners and PVA obligations with task workflows and customizable reports and dashboards. Efficiently monitor activities for timely completion to reduce compliance risk.

### Efficient PVA lifecycle management.

Centralize PVA documents and workflows in a single system to manage all of your PVAs and SDEAs from authoring through termination.

### Always use the right version.

Automated version control ensures the correct PVA version is always used and improves inspection readiness.

## Features

### **Automated Obligation Scheduling**

Automate recurring PVA activities to support real-time reporting and reduce manual effort.

### **Real-time Document Distribution**

Securely share documents with partners via email or a Vault workflow and track their activity, including receipt and acknowledgment.

### **Version Control**

Automate versioning and easily compare documents to previous versions to see how the content was changed.

### **Automated Notifications**

Receive automatic alerts when a pharmacovigilance agreement is due to expire.

### **Reports and Dashboards**

Track operational metrics to determine the status of PVA obligations, as well as oversight of partner activities and compliance.

### **Configurable Workflows**

Automatically generate tasks for external partners to ensure agreed-upon obligations are completed timely.

### **User Access Management**

Set up secure user access roles to define what content users are allowed to view or edit and what activities they can complete.

### **Template Management**

Create and store PVA templates to speed up the time to draft new pharmacovigilance agreements.
