

Modernize Your Clinical Trials with Clinical Transfer

Oversight without overinvestment: Know what's going on in your trials to take action sooner.

Unlocking the Power of Seamless Data Exchange

Clinical Transfer automates the daily transfer of relevant Veeva CTMS data from a CRO Vault to a Sponsor Vault. This feature simplifies data transfers between the CRO and the Sponsor Veeva CTMS system and provides near

real-time access to data for Sponsors, without custom integrations or manual effort.

By enabling Clinical Transfer you can foster stronger study team engagement, optimize processes, drive higher quality outcomes and ultimately reduce timelines.

01. Improved Compliance

Strengthened sponsor oversight: Enables sponsors to demonstrate evidence of study oversight in compliance with evolving regulatory guidelines.

02. Automated CTMS Data Transfer

- **Streamlined data practices:** Minimize manual data entry, eliminate redundant processes, reduce errors, and ensure data consistency.
- **Optimized resources:** Reallocate time spent on building custom reports and reconciling data to support more strategic initiatives.

03. Enhanced Collaboration

- **Shared view of critical data:** Foster transparency and proactive communication between Sponsor and CRO.
- **Faster issue resolution:** Identify and address challenges together quickly and efficiently.
- **Informed decision-making:** Leverage real-time data for better insights.

04. Accelerated Timelines

- **Faster study start-up:** Initiate trials more rapidly and gain real-time visibility into trial progress.
- **Rapid delivery of results:** Accelerate the path to discovery and patient benefit.

05. Focused Strategic Activities

- **Drive innovation:** Empower your team to focus on data analysis, patient engagement, and scientific breakthroughs.
- **Minimize technical debt:** Drastically limit custom tech integrations, including ongoing maintenance, and focus on strategic technology projects.

Partnering for Success:

Veeva is committed to a smooth and successful Clinical Transfer. To learn more about activating this native feature within Veeva CTMS **contact us today** to schedule a meeting.
